RONDA DE PREGUNTAS

INTRODUCCIÓN

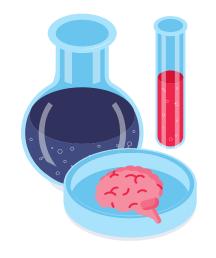

¿Qué es la enfermedad de Huntington?

¿Qué es la enfermedad de Huntington?

Enfermedad rara genética neurodegenerativa hereditaria

Producida por una mutación en el gen de la proteína Huntingtina

De 5 a 10 afectadxs cada 100.000 habitantes

Síntomas y tratamientos

Movimientos involuntarios, dificultad en el habla, pérdida de memoria, demencia, depresión y suicidio

Dependencia completa en los estadíos más avanzados de la enfermedad

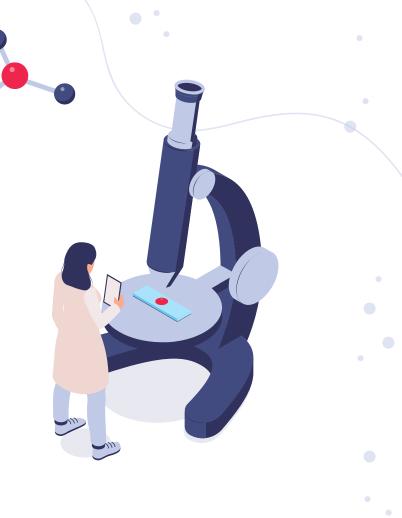

Tratamientos
paliativos
farmacológicos
Sin cura
actualmente

GENÉTICA BÁSICA

Teoría para entender el caso práctico

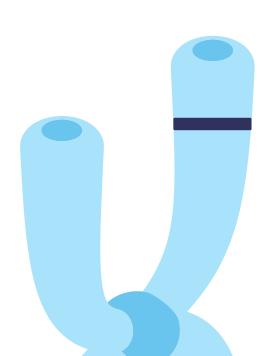

Estructura que contiene todos los genes

Estructura que contiene todos los genes

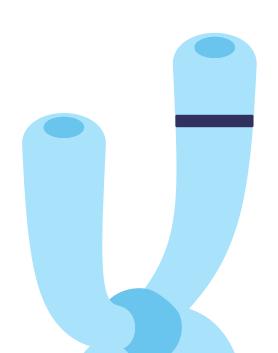

Estructura que contiene todos los genes

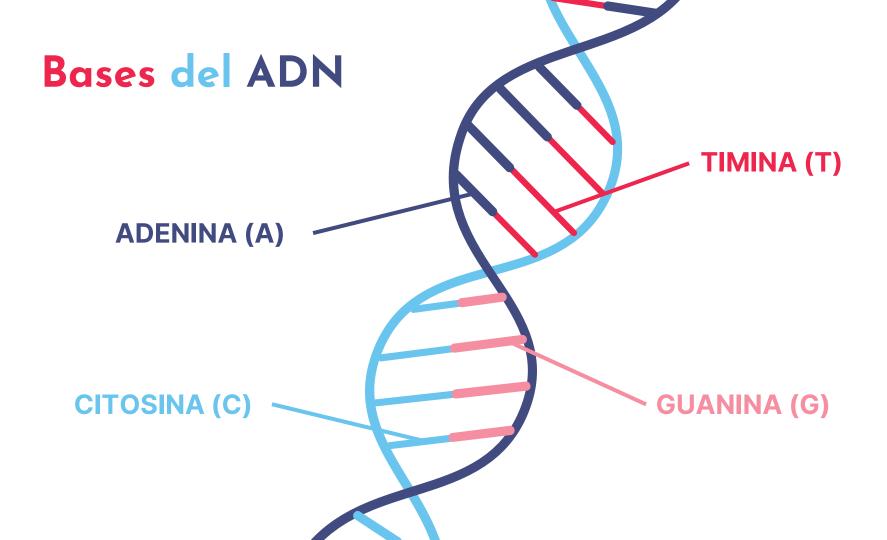

Segmento de ADN que determina un rasgo

Doble hélice formada por bases

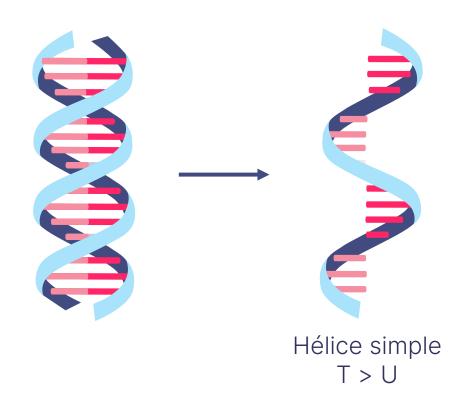

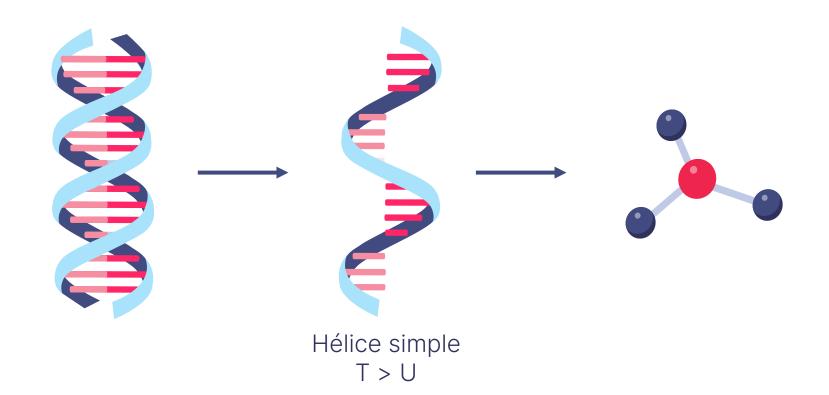

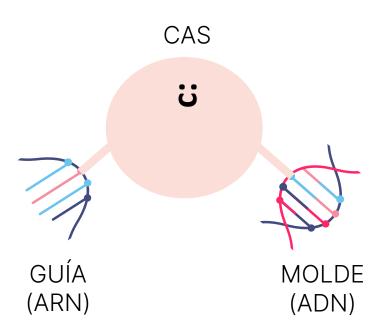

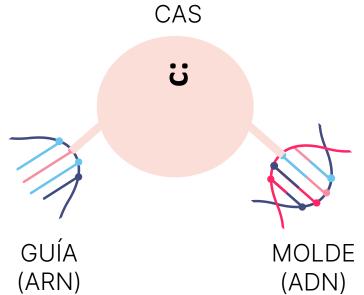

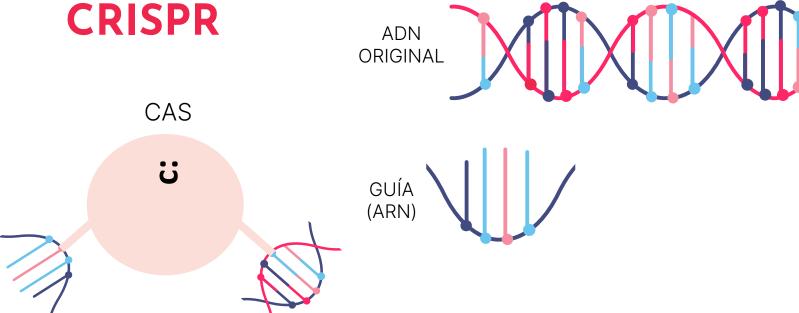

Corta y pega de secuencias de ADN (edición genética)

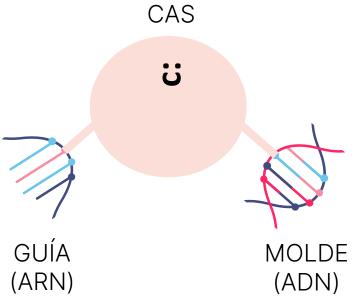

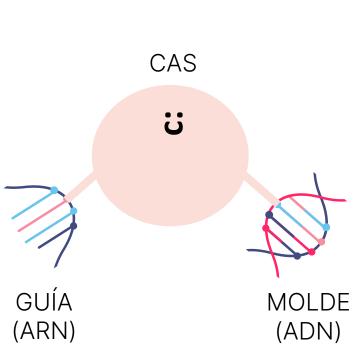

GUÍA (ARN)

MOLDE (ADN)

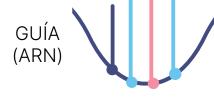

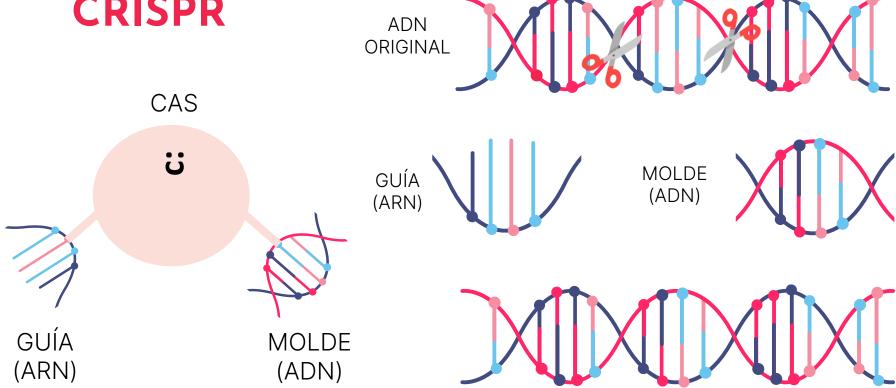

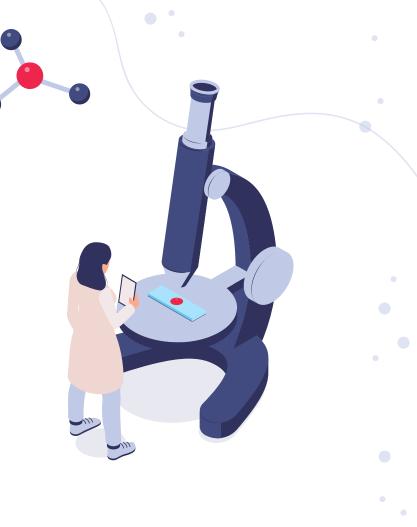

03

CASO PRÁCTICO

Tratamiento con CRISPR y Python

GEN HTT DEFECTUOSO

...GTCCCTCAAGTCCTTCCAGCAGCAGCAGCAGCAG...

> 40 repeticiones

Posición 5197

GEN HTT CORREGIDO

...GTCCCTCAAGTCCTTCCAGCAGCAG...

8-34 repeticiones

GEN HTT DEFECTUOSO

...GTCCCTCAAGTCCTTCCAGCAGCAGCAGCAGCAG...

> 40 repeticiones

Posición 5197

GEN HTT CORREGIDO

...GTCCCTCAAGTCCTTCCAGCAGCAG...

8-34 repeticiones

Timeline del tratamiento

Obtención de datos

Secuenciación genética del paciente

Python

Automatiza el diseño de CRISPR

Síntesis

Producción bioquímica del sistema con guía y molde

Inyección

Intracraneal o intravenosa

Más aplicaciones terapéuticas.

Células CAR-T contra el cáncer

Terapia antiviral (SARS-CoV-2, VIH)

Lucha contra enfermedades infecciosas (malaria, fiebre amarilla)
